16. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

I prompted Claude to make my group and I a presentation. It gave it to me in pure HTML. I know how to read HTML code, and proofread all of the code it provided and changed/modified the code to reflect our needs. I did not ask it to rewrite the presentation. There was no text completion or ideation needed for this assignment, as well as no need for text analysis. the AI tool was used to summarize our script into points, which I proofread over as well, but the points on the slides were made entirely by AI. There was no research done in this assignment. The AI did write code, which

was the presentation itself in HTML format, but the rest of the coding options are not applicable as there was no need to test, debug, or explain any of the code it created for the presentation. The AI also did all of the illustration (with code), where it made all of the presentation components.
