CMPT 276 - AI Disclosure Form - Summer 2025

Why this survey? This disclosure form aims to *help us understand and reduce any potential risks* related to the use of AI tools in this course.

Please complete the survey **by yourself** and be **truthful**. *Using AI tools will not negatively affect your marks for the assignment/lab/etc.*

What do we mean by AI tools in this survey?

AI content generators refer to any tools that create any type of content, including (but not limited to):

- ChatGPT and all other large-scale language models;
- Stable Diffusion and other AI-based Image Generators;
- Code extensions for IDEs;
- Other tools that are capable of generating text, image, codes, or any other content for the course work. BUT, <u>Grammarly and other grammar checkers are NOT included.</u>

For more information on our policy, please refer to: <u>https://parsa-rajabi.github.io/CMPT-276/#/ai-policy</u>

1. First Name (as appears on Canvas) *

    Carter

2. Last Name (as appears on Canvas) *

Jones

3. Student ID *

310585854

4. Which assignment/lab/project submission is this AI use disclosure for? *

Project submissions are included as "MX" aka Milestone X, where X is the milestone number

M2-Code

5. How do you feel about using AI content generators in relation to your personal standards of
   academic integrity for this submission? *

	Completely Acceptable	Somewhat Acceptable	Neutral	Somewhat Unacceptable	Completely Unacceptable
In my personal standard of academic integrity, using AI content generators for this submission is...	○	◉	○	○	○

6. Please explain your rating above regarding academic integrity of AI use for this submission. Why? (Write in 2-3 sentences) *

For the code, I kind it is somewhat acceptable. I feel that AI can be used responsibly when coding for the final delivery. Using AI to complete everything is not acceptable, but using AI to assist in debugging, idea generation, or helping expand on ideas if someone does not know how to implement their ideas can be very acceptable.

7. Did you use AI tools for this submission? *

(●) Yes

(○) No

8. For this submission, how would you rate the relative contribution made by your versus AI? *

This submission is...	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself
	●	○	○	○

9. How did using AI content generators impact **your learning** for this submission? *

	Greatly benefited my learning	Somewhat benefited my learning	Had no impact on my learning	Somewhat hindered my learning	Greatly hindered my learning
Using AI content generators for this submission...	●	○	○	○	○

10. Please explain your rating above about AI's impact on your learning for this submission. (Write in 2-3 sentences) *

I feel that AI has greatly impacted my learning on this project. AI has been able to assist me in learning how to use Jest for test cases and how to implement these test cases into workflow files that can greatly impact the final delivery of a project. Learning to use Jest to mock API responses was a very daunting task for me, but AI was able to assist in my learning, along with the Jest documentation, to allow me to deliver the testing that I wanted.

11. List the name all the AI tools that you used for this submission *

Claude and ChatGPT

12. How confident were you in AI's responses that you received? *

◉ Confident

○ Somewhat confident

○ Neutral

○ Somewhat not confident

○ Not confident

13. How did you ensure the answer you received from the AI tool was correct? *

I have taken other CMPT courses, so I am not unfamiliar with unit testing and what it needs to achieve. This allowed me to take the info that AI was providing and see if it aligned with my previous testing knowledge. Using Just is similar to using assertions for testing in C++. For that reason, I feel that I could be confident that the info I was being provided was accurate.

14. Did you at any point abandon using AI tools and seek other resources? Explain your answer. (optional)

What made you abandon using the AI tool? Were you more successful using other resources? Input N/A if you have not used any

Enter your answer

15. For each of the following items, how would you rate the relative contribution made by you versus AI? *

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Not applicable
Writing - Proofreading: To revise written work for grammar, typos, style, and other related items	○	○	○	○	○	◉
Writing - Text Completion: To complete sentences, paragraphs or even entire documents	○	○	○	○	○	◉
Writing - Text Ideation: To generate new ideas, concepts; and examples for writing submissions	○	○	○	○	○	◉
Text analysis: To make sense of text and generate insight as to what it means	○	○	○	○	○	◉

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Not applicable
Summary: To quickly understand large amount of text by extracting important information	○	○	○	○	○	◉
Q&A + Research: To get answers from questions and find relevant information	◉	○	○	○	○	○
Illustration/Sketching: To create visual representations of concepts and ideas such as diagrams, charts, illustrations	○	○	○	○	○	◉
Coding - Write: To generate code by AI for software implementation	○	◉	○	○	○	○

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Not applicable
Coding - Test: To generate code tests by AI for software implementation	○	○	◉	○	○	○
Coding - debug: To identify issues with existing code for software implementation	○	◉	○	○	○	○
Coding - explanation: To understand what a code snippet does for software implementation	○	◉	○	○	○	○
Other: to help any other aspects of the submission not listed above	○	○	○	○	○	◉

16. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

To start, I put code tests as evenly split between AI, because while I did implement most of the tests myself, while using AI to learn how Jest sets up tests, I wanted examples, so I had AI use direct examples from our app idea. This led me to see how to set up tests that I directly used in our unit and integration testing. I used AI at points to help debug issues with deploying the CI pipeline. It was my first experience with GitHub workflows, and especially trying to automate testing. I had struggles with starting the Next.js server and having the tests complete while accessing the API key in the GitHub secrets. Going along with debugging and testing, this meant some of the code I want to disclose as AI-written because I saw it first using AI to make the tests or change code to fix bugs.

17. Please provide use this space to provide any other information that you'd like to disclose (optional)
